

TYPICAL PROPERTIES

- Appearance: Clear, orange liquid
- Specific Gravity: 1.0 - 1.1
- Flash Point: None to boiling
- pH: 12.5 - 14.0

Oven Cleaner 2559

OC-2559

Description

OC-2559 is a water base alkaline cleaner designed to remove baked-on paint residues from the interior of drying ovens. It is useful for cleaning both topcoat and E-coat ovens. OC-2559 can also be used as a general maintenance cleaner. In this application, OC-2559 is diluted with water to a level appropriate to effect satisfactory removal of the target soils.

Recommended Application

1

OC-2559 is used as supplied.

2

It can be applied to oven walls by spraying, brushing, or wiping.

3

Once the soil is attacked, the surface should be thoroughly rinsed with water to remove all residues of the cleaner.

Benefits

- Water based
- Economical
- Widespread Utility
- Effective on E-Coat and Topcoat ovens

Health & Safety

Avoid contact with skin and eyes; wash thoroughly after handling. Avoid breathing vapor; use with adequate ventilation. Refer to SDS for complete health and safety information.

Storage

KEEP FROM FREEZING! Store in a dry location at room temperature.

Application

As the OC-2559 contains caustic, care must be taken to avoid skin and eye contact. If spraying, the product should not be "misted" and respiratory protection provided.

The preferred method of application is foaming onto the surface using a foaming applicator. And since the OC-2559 contains caustic, care must be taken to insure against attack on soft metal surfaces like aluminum, magnesium, or galvanized metals. When working on such substrates, the contact time after soil removal from the surface should be kept at a minimum.
