

TYPICAL PROPERTIES

- Appearance: clear, red, thick liquid
- Specific Gravity: 1.0 - 1.1
- Flash Point: 212° F
- pH:12.5 - 13.5

Oven Cleaner 4021

OC 4021

Description

OC-4021 is a water based alkaline oven cleaner designed to remove baked-on paint residues from the interior of drying ovens. The viscosity of OC-4021 has been adjusted to provide excellent vertical surface retention.

Recommended Application

1

OC-4021 can be sprayed, as with a garden sprayer, or manually applied by brush.

The amount of material required, setting time, and the amount of mechanical agitation needed will depend upon the severity of the build-up and the plants' operational constraints.

2

Rinsing of this product can be accomplished using either high or low-pressure water spray.

Benefits

- Water based
- Effective on E-Coat and Topcoat ovens
- Thick viscosity for vertical retention

Material Compatibility

Since OC-4021 contains caustic, care must be taken to insure against attack on soft metal surfaces like aluminum, magnesium, or galvanized metals. When working on such substrates, the contact time after soil removal from the surface should be kept at a minimum.

Health & Safety

Avoid contact with skin and eyes; wash thoroughly after handling. Avoid breathing vapor; use with adequate ventilation. Please refer to SDS for complete health and safety information.

Storage

KEEP FROM FREEZING! Store in a dry location at room temperature.
