

TYPICAL PROPERTIES

- Appearance: thick, white liquid with a mild odor
- Specific Gravity: 0.9-1.1
- Flash Point: 212° F
- pH: 11-12.5 (1% solution)

Oven Cleaner 4676

OC 4676

Description

OC-4676 is a water based alkaline oven cleaner designed to remove baked-on paint residues from the interior of drying ovens. OC-4676 contains a buffering agent, which allows it to be used on soft metals such as aluminum. The viscosity of OC-4676 has been adjusted to provide excellent vertical surface retention.

Recommended Application

1

OC-4676 can be sprayed or manually applied by brush.

A uniform application will insure more consistent performance. The amount of material required, setting time, and the amount of mechanical agitation needed will depend upon the severity of the build-up and the plants' operational constraints.

2

Rinsing of this product can be accomplished using either high or low-pressure water spray.

In cases of severe build-up or extended exposure times, high-pressure water rinse will yield better results.

Benefits

- Water based
- Safe to use on aluminum
- Contains no nonyl phenol ethoxylates

Health & Safety

Avoid contact with skin and eyes; wash thoroughly after handling. Avoid breathing vapor; use with adequate ventilation. Please refer to SDS for complete health and safety information.

Storage

Store in a dry location at room temperature.
