GENERAL CHEMICAL CORP.

Alubrite 6450

Aluminum Cleaner & Brightener

Description

Super concentrated blend of acids and surface cleaners designed to restore aluminum. Works at ambient temperature.

Recommended Application

1. Alubrite is used at 20% concentration.
2. Spray, brush, or wipe surface.
   Alubrite may also be used in a water bath at 20% concentration. Wait at least one minute for best results.
3. Rinse thoroughly with water.

Benefits

- Super concentrated
- Works at ambient temperatures
- Removes oxidation
