PaintShield 5140

Peelable Coating

Description

Temporary, protective automotive peelable masks for protecting automobile designed to combat the hazards that a vehicle faces on today's highways. Rock chips, insects, bad weather, and salted roadways are just some of the things that can damage the beautiful factory finish of a vehicle and diminish its value. Paintshield 5140 represents the ultimate in non-solvent peelable coatings. It is well stabilized against brittleness and it will not be softened or penetrated by most solvent-based paints. Paintshield 5140 has no VOC's.

Recommended Application

Paintshield 5140 is normally used as received.

It is applied by airless spray, roller or brush.

Paintshield 5140 is applied to form a film thickness in the range of 2 to 5 mils (.002" to .005").

The sprayed peelable coating air-dries in 10 minutes to 3 hours, depending on thickness of the coating, humidity, temperature and air movement.

Application temperature is ambient to no lower than 60° F. Humidity will effect dry times.

Benefits

- Multifunctional product.
- Effective protection.
- Efficient delivery systems that make it economical to treat hard-to-protect items.
- Easy application.
- Improved health, safety, and pollution control.
- Elimination of extra processing steps in most cases
