

### TYPICAL PROPERTIES

- Appearance: Thick, clear liquid
- pH = 7.5 - 8.5
- VOC (EPA 24) = 0.1 lbs/gal
- Flashpoint = None
- Specific Gravity: 1.02 - 1.03
- Odor: Mild Ammonia Odor

# Tacky Booth Coat 10 HT

## High Temperature Tacky Coating

### Description

TBC-10-HT is a water based tacky coating that has been formulated to remain tacky for a long period of time at temperatures up to 180°F. The viscosity of this product provides excellent surface retention, allowing for easy application to both horizontal and vertical surfaces. The clear, tacky coating formed by TBC-10-HT effectively traps airborne particulate, thus providing cleaner paint jobs. In addition to paint spray booths, TBC-10-HT can be used for flash-off zones and oven vestibules.

### Recommended Application

1

TBC-10 HT is used as received.

2

Apply a uniform film of 10-15 wet mls with airless spray equipment.

### Benefits

- Water Based
- Nonflammable
- Remains Tacky for Extended Periods of Time Up to 180°F
- Produces a Clear, Transparent Film When Dry
- Low VOC

### Health & Safety

Please refer to separate SDS for complete health and safety information.

### Storage

KEEP FROM FREEZING! Store in a dry location at room temperature. Keep container closed and maintain all original markings and labels.

### Application

Recommended application is with airless spray equipment, however, air atomizing spray equipment, brush or roller application may be used.

### Tack Free Drying time

With booth air on, the film will be damp but non-smearing in 40 to 50 minutes and dry in 60 minutes.

### Removal

Easily removed with water.
