

# Low-Cor 33

## CORE BAKE FLUX

### TYPICAL PROPERTIES

Appearance: Red Clear Liquid  
Weight: 9.97 lbs/gal  
pH: < 1.0

### Description

Low-Cor 33 has greater bonding strength of tubes to fins. It can be applied with spray or cascade application. Heavy metals can be easily precipitated. Also reduces waster water treatment cost significantly. Low- Cor 33 easily removes forming lubricants, mill soils, and metal oxides.

### Recommended Application

1

Low-Cor 33 may be applied by spray, cascade, or immersion.

Dilute Water : Flux 7 : 1 - 11 : 1

### Benefits

- Easier wastewater treatment
- Leaves virtually no residues
- Superior bond formation and strength
- Designed to work on large and small cores
- Excellent heat transfer characteristics.
- Used with wide range of alloys.
- Works well at a wide range of temperatures.
- Will not discolor cores.
- Concentration controlled by a simple titration procedure.
- Excellent shelf life.

### Health & Safety

Please refer to SDS for complete health and safety information.

### Storage

Shelf life: 1 year from date of manufacture.
