Booth Grease 4550 Gold

Booth Grease

Description

GOLD GREASE 4550 has been formulated for application to baffles, back sections, stacks, underbooth areas and other locations where a greasy coating is desired to prevent adhesion of paint overspray. It is water resistant and has good adhesion to vertical surfaces.

Recommended Application

1

GOLD GREASE 4550 can be applied by 30:1 airless spray, brush, roll or trowel.

Benefits

- Facilitates easier future clean-outs
- Easily removed by scraping
- Easy application

Health & Safety

Please refer to SDS for complete health and safety information.

Removal

The protective barrier is easily removed with scraping.
